Our Vision: The West Yorkshire and Harrogate cancer system pulling together as one, with common objectives, actively breaking down barriers and maximising resources, with the aim of being able to deliver the best possible, seamless, clinically led and patient driven health and social care so that every person affected by cancer is assured of the best possible outcomes.

Find, diagnose and treat more cancers quicker	Provide high quality, timely personalised care as close to home as possible that focuses on support and experience as much as clinical outcomes	Reduce variation of clinical outcomes, patient experience and access through standardised pathways	Improve cancer survival with patients living well after a cancer diagnosis	Ensure services work in a coordinated way that is easily accessible and navigated	Ensure a workforce that is happy, flexible and skilled

What we are doing across West Yorkshire & Harrogate

<p>Co-design and deliver evidence based community based campaigns to increase uptake of bowel and cervical screening in areas and populations with low uptake, developing resources as required and evaluate the impact.</p>	<p>Community based delivery of lung health checks and low dose CT scans. Offer of smoking cessation support at the point of lung health check.</p>	<p>Macmillan Implementation Manager posts developed to support individual teams to embed all elements of personalised care across the whole pathway, ensuring all patients are offered an holistic needs assessment, care plan, health and wellbeing support, an end of treatment summary and a cancer care review.</p>	<p>Standardised and rapid referral pathways for suspected cancer or vague but concerning symptoms will increase the number of patients on a managed suspected cancer pathway to reduce the amount of people diagnosed through emergency admissions and increase the number of people diagnosed at stages 1 and 2.</p>	<p>Linked lung pathways from primary care to tertiary care for lung health check patients.</p>	<p>Upskilling of primary care nurses and health care assistants through the delivery of lung health checks</p> <p>Training programme being rolled out Alliance-wide for cancer nurse specialists (CNSs), cancer care co-ordinators and other professionals implementing the Recovery Package within their team.</p>
<p>Offering targeted lung health checks – stage shift at diagnosis, more diagnosed at early stage.</p>	<p>Bradford personalised support coordination pilot, offering support and care tailored to individuals and provided in the community, making use of existing services.</p>	<p>Patients can access a Rapid Diagnostic Centre for their serious but non-specific symptoms, wherever they live within WY and H and receive the same level of care and clinical expertise.</p>	<p>Support, networking, guidelines and tools provided to enable all Trusts to develop risk stratified follow up protocols for three main tumour groups.</p>	<p>Operational Delivery Networks for teenage & young adult cancers. Also for children and young people’s cancers in order to improve outcomes, simplify pathways and transitions between services and ensure every patient has access to specialist services.</p>	<p>Raising awareness of system capacity & working with Trusts to improve capacity and resilience in radiology & respiratory teams</p> <p>Establishing the roles of Advanced Practitioner/Clinical Therapeutic Radiographer to support the prostate cancer pathway based on the pathway analysis work undertaken by the Improvement Support Team.</p>
<p>Be Clear on Cancer Campaign to encourage patients to seek help earlier for potential lung cancer symptoms.</p>	<p>Developed gold standard holistic needs assessment document, Recovery Package memorandum of understanding and treatment summary principles to ensure consistency and quality.</p>	<p>Through the patient education bursaries, patients have information and know how to access services they require to remain healthy and supported.</p>	<p>Engagement with staff and professionals to identify variation in experiences for those living with a palliative cancer diagnosis. Event held to translate report recommendations into locality owned actions and metrics being developed to be monitored at an Integrated Care System level.</p>	<p>Developing an evidence base for cancer care reviews through an audit in 12 General Practices across the six places which will also include interviews with patients.</p>	<p>Optimal Pathway Groups for all cancer sites will be established with oversight provided by a WY and H Clinical Advisory Board. Recruit to clinical leadership and programme infrastructure.</p> <p>Increasingly multidisciplinary workforce, providing newly emerging clinical progression routes.</p>
<p>Through radiology networking there will be consistent, high quality imaging available across the region to support quick and accurate diagnosis.</p>	<p>Rapid Diagnostic Centres will provide personalised diagnostic journey, wrapped around the patient and at a location that works for them, reducing anxiety for patients – whether receiving diagnosis (cancer or non-cancer), or all clear.</p>	<p>Each established Cancer Optimal Pathway Group has a detailed work programme for 2019/2020 based on an assessment against the national optimal pathways or against NICE guidelines, WY and H key metrics with gaps identified and a plan to address these.</p>	<p>Engagement with staff and professionals to identify variation in experiences for those living with a palliative cancer diagnosis. Event held to translate report recommendations into locality owned actions and metrics being developed to be monitored at an Integrated Care System level.</p>	<p>Streamlined diagnostic services that use the same approach and underpinning tool to monitor and manage demand and capacity.</p>	<p>Options for staff to work flexibly across the region where appropriate.</p> <p>Radiology and pathology networking will enable a sharing of diagnostic imaging capacity across the region through digital</p>
<p>Mandated cancer waiting time standards collected - achievement of 62 day standard across the Alliance is variable. Data on the 28 day Faster Diagnosis Standard (FDS) is not yet available for analysis – mandated collection on 1 April 2019, FDS reports expected June 2019. Published data on activity from 1 April 2020.</p>	<p>Undertaking a rapid review to map prostate biopsy practice across the Alliance and whether resource and funding available to deliver trans-perineal biopsy. Work underway to review WY and H non-surgical oncology model and develop a networked approach.</p>	<p>Wakefield Healthwatch have developed a bespoke patient experience survey for the lung health check service and low dose CT scanning service.</p>	<p>Engagement with staff and professionals to identify variation in experiences for those living with a palliative cancer diagnosis. Event held to translate report recommendations into locality owned actions and metrics being developed to be monitored at an Integrated Care System level.</p>	<p>Review analysis of cancer pathway milestones with Trusts to identify delays and obstacles and implement improvement plans to streamline and co-ordinate care.</p>	<p>Apply new technology to support staff including remote working and artificial intelligence (AI).</p>
